

Zaki::Util::ObjEvent

```
graph BT; ZakiUtilObjCopiedFrom[Zaki::Util::ObjCopiedFrom] --> ZakiUtilIObjCopiedFrom[Zaki::Util::IObjCopiedFrom]; ZakiUtilIObjCopiedFrom --> ZakiUtilObjBiEvent[Zaki::Util::ObjBiEvent]; ZakiUtilObjBiEvent --> ZakiUtilObjEvent[Zaki::Util::ObjEvent];
```

The diagram illustrates a class hierarchy with four classes arranged vertically. At the bottom is 'Zaki::Util::ObjCopiedFrom'. An upward arrow points to 'Zaki::Util::IObjCopiedFrom'. Another upward arrow points to 'Zaki::Util::ObjBiEvent'. A final upward arrow points to 'Zaki::Util::ObjEvent' at the top. The top class, 'Zaki::Util::ObjEvent', is enclosed in a dashed rectangular border, while the others are in solid borders.
